Silk

*Silk extracts smooth wrinkles,
protect the skin, make it appear fresh and radiant,
have a calming effect and have a skin - smoothing,
So called anti-aging effect.*

Feli'S
mallorca

Another great feature

*Due to protein structure,
The power proteins
fibroin and sericin
and the amino acids it contains,
the liquid silk has exceptionally great properties.*

*The silk is anti-allergic, 100 % organic, particularly skin-friendly
and therefore suitable for all skin types.*

Problem skin

*People with skin problems particularly benefit from
this precious of nature.*

*Thanks to collagen synthesis,
an activation process in the cells of the connective tissue,
the skin regenerates significantly faster,
Pimples and redness heal very quickly and itching
disappears immediately.*

*Particularly effective for sun-damaged skin,
neurodermatitis, psoriasis, itching,
allergies and rosacea.*

For the hair

Silk proteins protect and regenerate weak hair damaged by styling, environmental influences or the sun, Smoothing it and making it resilient.

They don't weigh it down like an oil, but rather form a protective film around the hair.

Silk extracts and hydrolyzed silk

attach themselves directly to the hair as a thin protective layer and improve the appearance of the hair.

They penetrate deep into the hair structure, provide moisture and visibly improve the appearance of the hair, giving it strength and a healthy shine.

It's is therefore also known as liquid hair.

The history of silk

*In the 1930s, at a silk factory in Tokyo,
It was discovered that all the woman employed there
Had particularly soft and delicate hands.*

*Silk was quickly identified as the culprit and the foundation
for the development of valuable skin care products was laid
and silk became an indispensable part of cosmetics.*

*The relatively high price is due to this
raw material to be produced,
transport via the Silk Road from China, India or Japan to Europe.*
